

MG MARVEL R Electric

Refined • Intelligent • Connected

Recharge yourself

Welcome Willkommen Bienvenue

Welcome on board

Welcome to a space you can make your own. To a design interpretation of the future. To a solid and powerful presence.

Welcome to class-leading safety, reliability and range. To a design philosophy based on technology inward, humanity outward. Welcome to zero emissions and fully electric driving. To unrivalled spaciousness and comfort. To accessibility and connectivity, wherever you are. Welcome to a marvellous sense of calm. To mission control, in your own cockpit.

Welcome to freedom and adventure... Welcome to the MG MARVEL R Electric!

Welcome to the future

The interior design of the MG MARVEL R Electric is based on a singular, forward-thinking principle: 'Technology inward, humanity outward'. From the moment you board the car, you'll experience a next-generation luxury automotive environment.

The R-Welcome Intelligent Welcome System detects your car key as you approach and automatically pops open the induction door handle to welcome you on board. The driver's seat moves back for easy entry, and 64-colour interactive ambient lighting signals the start of your next ride.

Inside, the MG MARVEL R Electric takes you into the future with its central 19.4-inch touchscreen console, letting you access every part of the car's interactive controls. The console appears to defy gravity with its floating and semi-transparent design, with a subtle hi-tech grace that is echoed throughout the interior.

On your drive, you'll be transported by the exceptional audio quality of the premium 9-speaker BOSE sound system. Easily access your music through the car's advanced Voice Control feature – which also lets you operate many other on-board functions, including the panoramic sunroof.

Express yourself

The MG MARVEL R Electric has the eye-catching looks to match its inner strength. A smooth, sporty design accentuates the SUV coupe body type, with a low and rear-leaning centre of gravity.

From the front, the forceful and elegant X-shaped face flows into wide, bold body contours, making an unmistakably powerful design statement. The generous 2.8-metre wheelbase makes the MG MARVEL R a commanding presence, with a spacious interior that perfectly complements the futuristic character of the exterior.

Reset Rethink Recharge

The MG MARVEL R Electric is a full battery-electric SUV for a new generation of drivers who value innovative design, personal comfort and outstanding performance, but also a confident range and fast charging capability.

Recharge yourself

- Inside and out, the bold, futuristic design is optimised for your ultimate driving experience.
- The 12.3-inch digital instrument panel provides total clarity, while the versatile 19.4-inch touchscreen puts every control at your fingertips.
- The spacious interior offers ample room for passengers and cargo, whatever the destination.
- The aluminium alloy sub-frame offers exceptional stability thanks to German-engineered chassis calibration.

- MG Pilot driver-assistance technology helps to prevent and avoid potential accidents and achieve partially autonomous driving.
- With three electric motors and a combined 288 PS and 665 Nm performance, the MG MARVEL R Electric accelerates from 0-100km/h in just 4.9 seconds. The unique Sports mode for Tri-motor AWD mode means it's ready for launch at all times. Snow mode is also available for safe driving in the winter.
- MG iSMART is a brand new connectivity system that integrates the car, the internet and user communication for real-time functional information and personalised entertainment. Make the most of hands-free control for music, navigation, phone, and vehicle control.

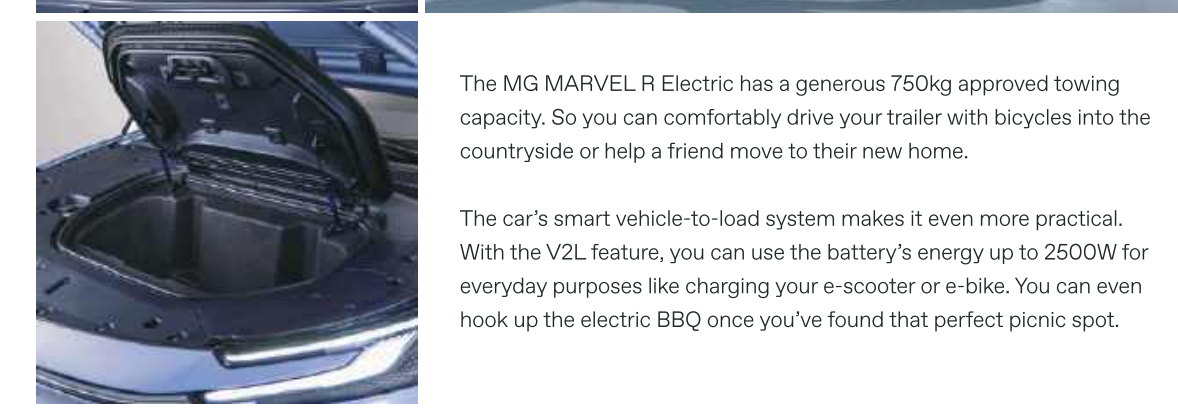

- 3-phase 11kW AC Fast and DC Rapid charging reliably delivers capacity from 8% to 80% in 43 minutes.
- All the electric motors on the MG MARVEL R use hairpin winding technology, with improved efficiency compared to the traditional winding method. The rear two motors work separately to ensure maximum efficiency.
- V2L system (vehicle-to-load) allows the lithium-ion battery to supply energy to an external electrical system.
- Experience total peace of mind with a full 5years or 150,000 kilometres MG warranty.

Next-level convenience

The MG MARVEL R Electric not only offers outstanding performance on the road, but also brings pragmatism to your business and leisure drives. For example, it offers convenient rear and front storage. The spacious rear trunk has a 360L volume accessed through a wide opening – which makes loading even large items practical and easy. The rear seat adopts a 60/40 design, letting you expand the trunk to a maximum volume of 1306L when folded down. The front trunk has a volume of 150L, accommodating tools, briefcases and other small supplies, or even a 24-inch suitcase.

The MG MARVEL R Electric has a generous 750kg approved towing capacity. So you can comfortably drive your trailer with bicycles into the countryside or help a friend move to their new home.

The car's smart vehicle-to-load system makes it even more practical. With the V2L feature, you can use the battery's energy up to 2500W for everyday purposes like charging your e-scooter or e-bike. You can even hook up the electric BBQ once you've found that perfect picnic spot.

Technology for better driving

The MG MARVEL R Electric not only exudes power. It also lives up to it with its performance.

With a top speed limited at 200 km/h, the SUV boasts a maximum output of 212 kW (288 PS) and a 665 Nm peak torque. This allows the MG MARVEL R Electric to accelerate from 0-50 km/h in just 1.8 seconds and from 0-100 km/h in just 4.9 seconds.

MG Pilot Keeping you safe on the road

- MG Pilot Camera 1
- Millimetre Wave Radar 3
- Parking Camera 4
- Parking Distance Ultrasonic Radar 8

The next-generation smart cockpit opens up a new intelligent interactive experience. The large instrument display and giant smart touchscreen controls work together to offer real-time traffic mapping, online music, DAB+ radio and many other functions. Thanks to the 360° camera, you enjoy a full-chassis view of your surroundings. And the low-speed 360° camera turning view adds extra safety to challenging manoeuvres.

Technology for better driving

The drive technology uses an advanced, finely calibrated all-wheel drive system with three electric motors: one on the front axle and two on the rear. The car is also offered in a rear-wheel drive configuration with two electric motors.

The two-speed gearbox guarantees an efficient and powerful driving experience. The MG MARVEL R Electric has a maximum range of 402 kilometres (WLTP) and with 3-phase 11kW AC Fast and DC Rapid charging reliably delivers capacity from 8% to 80% in 43 minutes.

- Automatic Emergency Braking (AEB)
- Adaptive Cruise Control (ACC)
- Traffic Jam Assist (TJA)
- Lane Keep Assistance (LKA)
- Speed Assistance System (SAS)
- Front Collision Warning (FCW)
- Intelligent High Beam Control (HBC)
- Traffic Sign Recognition (TSR)
- Rear Traffic Alert (RTA)
- Lane Change Warning (LCW)
- Blind Spot Monitoring (BSM)
- Emergency Lane Keeping (ELK)
- Drowsiness Warning System (DWS)
- Multi-Collision Braking (MCB)
- Door Opening Warning (DOW)

Make it your own

The MG MARVEL R Electric comes in 4 stunning colours

Technical parameters*

Dimension and weight	Value
